DIAMOND AIR CON
CHEMICAL CLEANING
& REFRESH

Air con filter keeps your vehicle cabin air clean by filtering away harmful and undesirable particles (such as dust, ticks, pollen and bacteria) from external air that may enter your vehicle through the air conditioning system. Genuine air con filter goes through extensive and vigorous tests to ensure the highest quality and performance.

Advantages of using Mitsubishi genuine air con filters

It filters and deodorises polluted air including ticks and pollen. Mitsubishi genuine air con filters comply with our strict standards that demand a superior level of performance, safety and reliability, and best fit for your vehicle.

How do I get a more comfortable interior?

Over time, your air con filter gets dirty and its filtering and deodorising capabilities will gradually decline. To keep your vehicle in good condition, we highly recommend periodic replacement of the Mitsubishi genuine air con filter at every 1-year or 20,000 km, whichever comes first.

Dust Filtering Rate

Dust Filtering Rate tests prove that genuine air con filters result in stronger, improved airflow from the air conditioning vents as compared to counterfeit filters. This is because genuine air con filters do not get clogged as easily as counterfeit ones.

Dust Filtering Test

Genuine air con filter outperforms counterfeit ones in the Dust Filtering Test, trapping particles from the exterior of the vehicle more effectively.

Exceptional Journeys

Benefits Of Caring For Your Air Conditioner

The importance of servicing your air conditioning system

Your vehicle's air conditioning system consists of both the air con filter and evaporator. The air con filter blocks undesirable particles such as dust from entering your vehicle through the air conditioning system. However, it takes more than just a clean air con filter to keep the air in your cabin fresh.

The evaporator located inside your vehicle's air conditioning system cools the air passing through it. High humidity makes it an easy and ideal breeding ground for bacteria and fungi in the evaporator coil. Not only do they cause bad odour, they may also cause asthma and infections.

Therefore, other than replacing the air con filter at recommended intervals, it is also important to periodically clean the evaporator to keep you and your passengers comfortable and healthy.

How often should you service your air conditioning system?

It is recommended to replace the air con filter and clean the evaporator for your health and comfort. Servicing the air conditioning system regularly ensures circulation of cool, clean and fresh air in the vehicle.

Why Choose Diamond Air Con Chemical Cleaning & Refresh

Diamond Air Con Chemical Cleaning & Refresh

- Eliminates bacteria, fungi, algae and microorganisms
- Includes application of evaporator cleaner
- Optimises performance of cooling system
- Provides long-term deodorisation
- Purifies air stream from evaporator coil
- Removes unpleasant odours
- Sanitises air conditioning unit
- Unclogs fin passages

The air conditioning system is disinfected and unpleasant odours are removed with the use of a cleaning technology that eliminates bacteria, spots and mould to provide fresh and clean air inside the vehicle.

Prices

Option 1 : Cleaning of evaporator coil and servicing of air con filter.

- **\$65** for 1 service
- **\$208*** for Plan with 4 services (U.P.: \$260), plus 15% off air con filter parts purchase.

Option 2 : Cleaning of air con evaporator coil and replacement of air con filter.

- **\$102** for 1 service

* CARE Plan Members enjoy additional 10% off.
Prices are inclusive of GST and subject to change without prior notice.

Mitsubishi Antibacterial Cabin Refresh

Antibacterial Cabin Refresh cleans and disinfects the cabin, removing any unpleasant odour. Bacteria, spores, mould and microorganisms are eliminated and prevented from regenerating for a period of time. It deodorises upholstery as well as carpets and refreshes the entire cabin.

To keep your vehicle in optimal condition, it is recommended to refresh both the air conditioning system as well as the passenger cabin on a regular basis.

Prices

\$38 (antibacterial cabin refresh)

Top up **only \$19** when you purchase Option 1 or Option 2.

Prices are inclusive of GST and subject to change without prior notice.

All Mitsubishi genuine parts replacement and repairs come with a 2-year or 40,000 km warranty, whichever comes first. Genuine parts always come with warranty, unlike non-genuine parts.
